CSE 335 Lecture Review Activity #1

Name:………………………………….

Note: Watch the XCode demo video and IntoToSwift sample app posted under Week 1 Module before you attempt this activity.

1.[10 Pts]

a) [7 pts] Develop a simple **SwiftUI** iOS app using swift that reads your first name and the last name using two separate TextFields and display a greeting once the "Greeting" button clicked. The greeting should have the following format.

<First name>   <last name> Welcome to CSE 335

b)[3 Pts] Add your own one simple functionality to the welcome app. Such as another button that uses voice controls to say Welcome to CSE 335, simple animation …etc.

Submission

Make a zip file containing your complete project folder named activity1.zip and upload it to the canvas so that we can download and run your project. Your app must run in iOS 17 simulator on Xcode 15.

NO LATE SUBMISSIONS WILL BE ACCEPTED
